

The Soonr Workplace— Do More Business Faster

How Much More Business Could You Do with Soonr?

The following are examples of how Soonr works for a variety of businesses:

- **CPAs**—Pass financial files securely and quickly without getting lost in email spam filters
- **Construction**—Push through change orders and avoid costly delays waiting for documented instructions
- **Real Estate Agents**—Connect with clients via immediate Smartphone uploads of photos and videos and then text to arrange a walk through
- **Attorneys**—Instantly fulfill court house requests for printing, faxing or emailing pertinent case files—from anywhere
- **Doctors**—View patients' health records and securely document comments paperlessly while remaining HIPPA compliant
- And many more professions

How it Works

Soonr enables file flexibility and collaborative sharing because its Desktop Agent copies your files to a single, secured designated location in the cloud. This enables files to be:

- Immediately available for sharing, editing, printing, faxing or restoring—anywhere there's an Internet connection
- Viewed or shared from any mobile device
- Organized into projects for private viewing by assigned team members for greater productivity

Technical & Security Information

- Supports both Windows and Macs
- iPhone, Android and Blackberry plus 800+ other mobile devices
- 256-bit SSL encryption in transit and at rest
- Data is mirrored and backed up regularly in two independent data centers that are physically monitored 24/7

A Better Way to Get More Done

Soonr securely enables you to do more with your files so you can do more business and provide better client service—wherever business takes you.

- **Work Together** - Choose your team members and work collaboratively with clients—it's a workplace that works for you.
- **Access** - Whether on the go or working with others, get unlimited and secure access to your backed up files to keep business moving forward.
- **Backup** - Automatically back up your files the instant you or your colleagues make changes for worry-free productivity.
- **Control** - Work more securely with virtual teams with complete access control every step of the way.

Soonr Projects

Do business faster by making sure you always have the files you need. Work locally, even offline, using the programs you already know and changes are automatically updated to all connected computers. You can access the files from the web or from any connected mobile device, even share across Macs and PCs.

When team members collaborate on Projects, changes are automatically owners have complete control over who accesses files and what they can do with the files. A secure web link is used to share with users outside the team.
